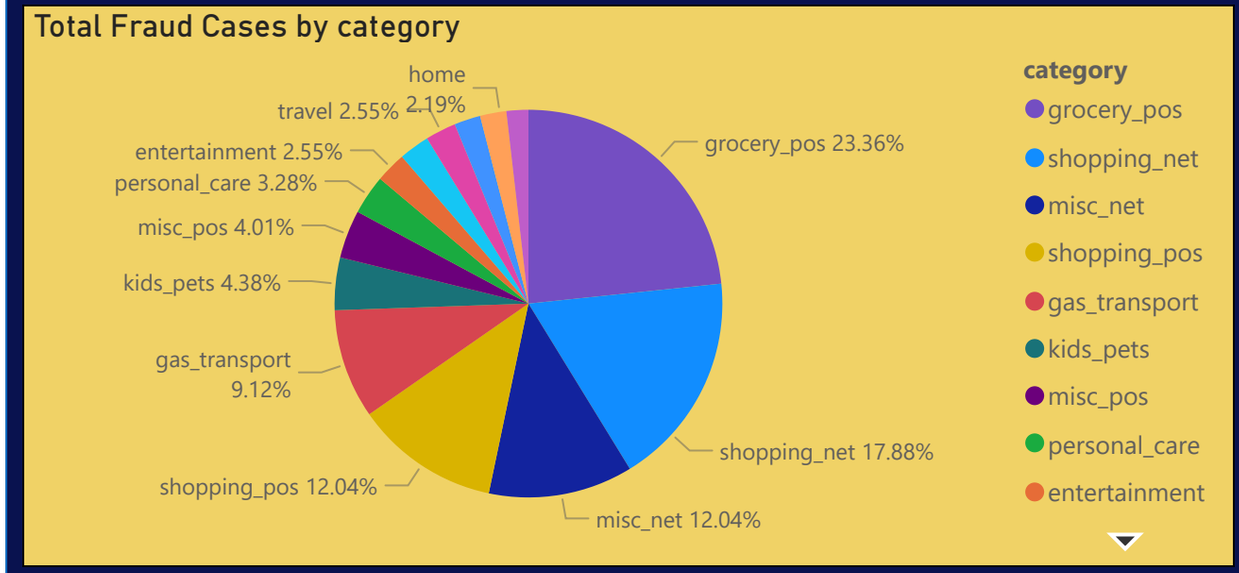
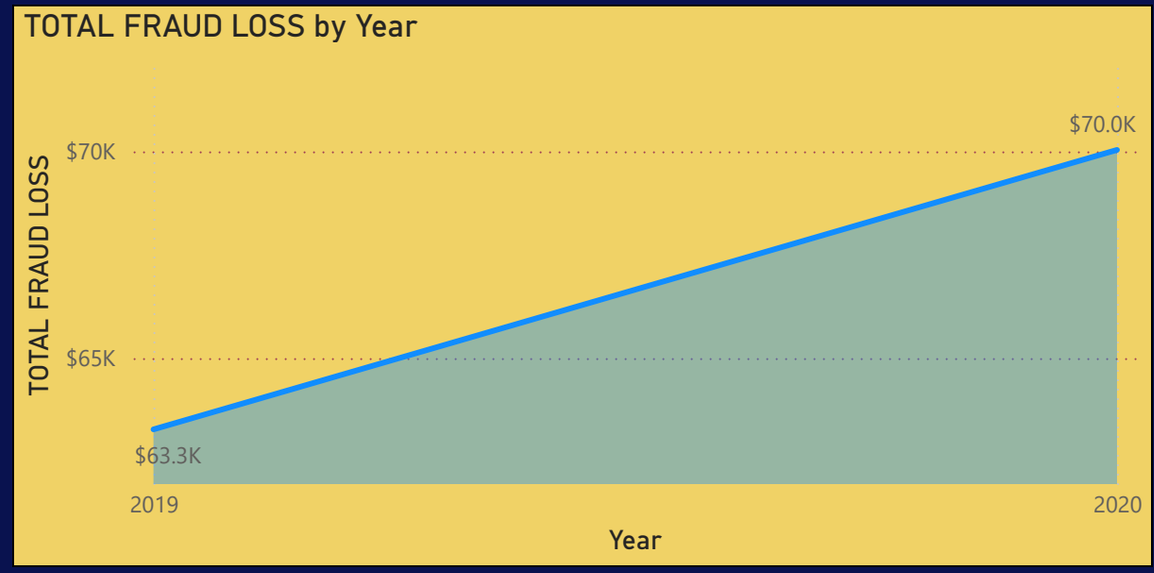
# 10.STRATEGIC SUMMARY

**$133.31K**
**Total Loss**

**$486.5477**
**AVG FRAUD AMT**

**61.43**
**AVG VICTIM AGE**





**EXECUTIVE SUMMARY** Total fraud exposure currently stands at **$[Total Loss]**, primarily driven by high-frequency leakage in **Online Shopping and Grocery** sectors. Demographic analysis identifies seniors aged **60–80** as the most vulnerable high-impact targets. Immediate intervention is recommended for geographic hotspots in **[Top State]** and **[Top City]** to mitigate further localized financial risk.

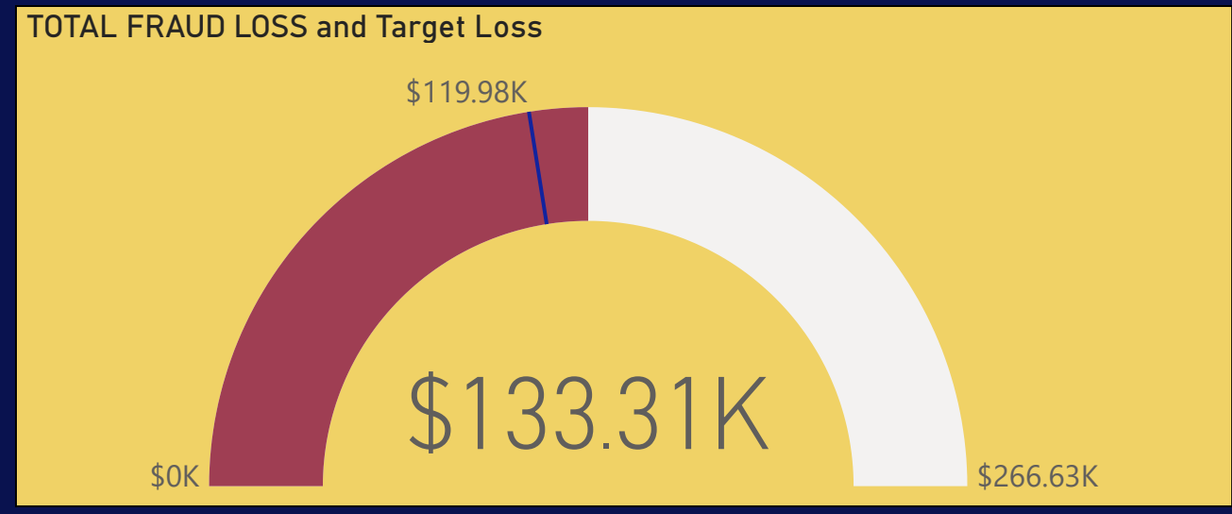
# 11.CONCLUSION

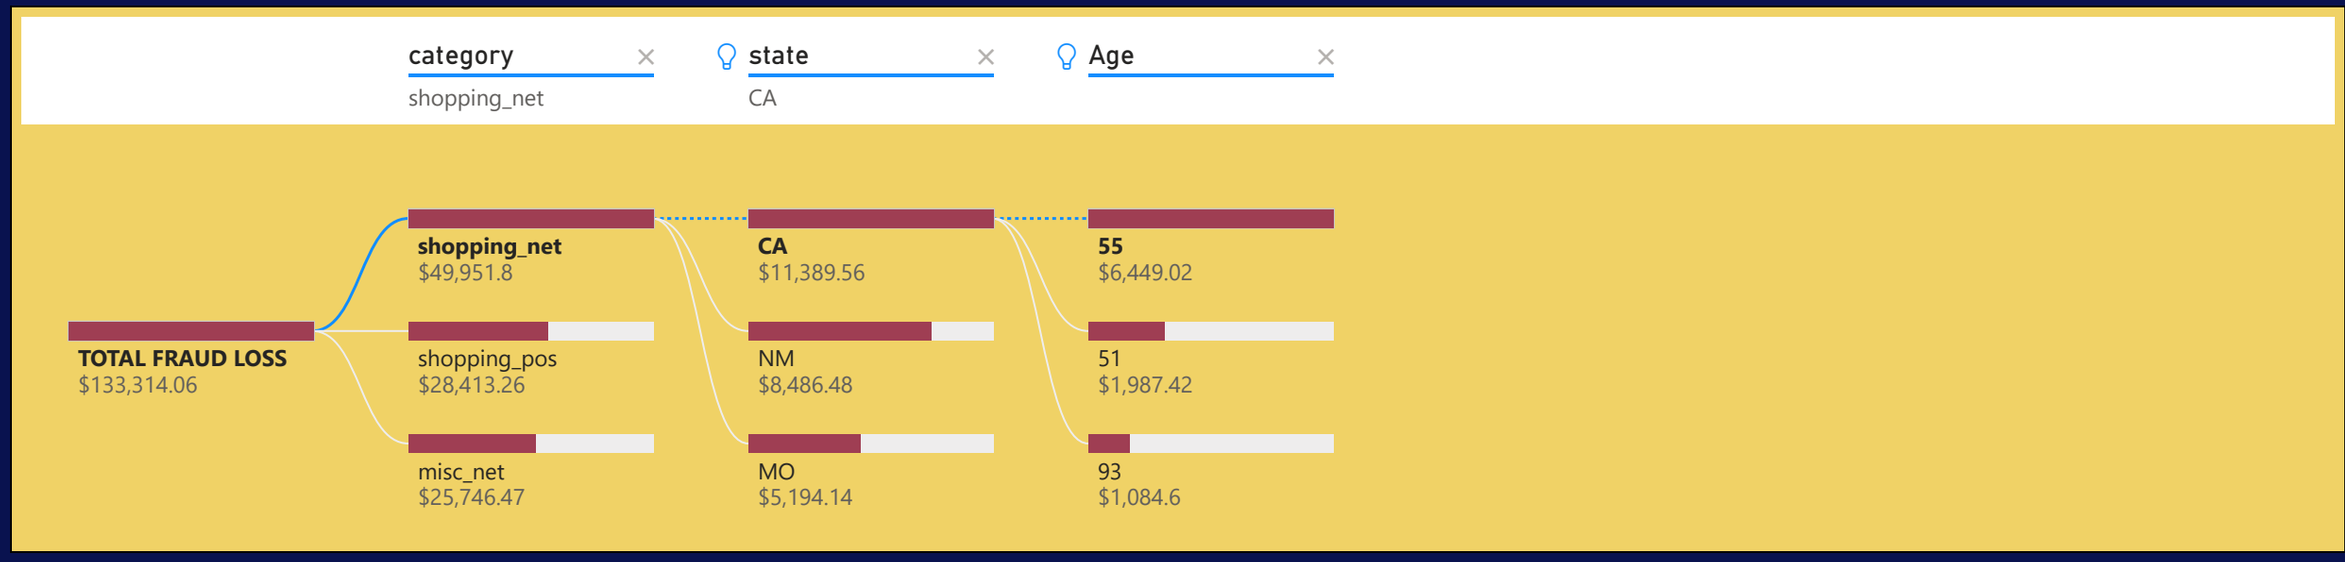
**THE AGE FACTOR**

- VICTIM PROFILE: Analysis shows that the **60-80 Age Group** represents the highest volume of victims. **Finding:** Senior citizens are being disproportionately targeted by social engineering fraud

**HIGH-RISK OCCUPATIONS**

- TOP INDUSTRY: Employees in the sector are 25% more likely to be targeted. **Recommendation:** Launch industry-specific security training for these professions.

**GEOGRAPHIC HOTSPOTS**




- GEOSPATIAL RISK: High-population cities in account for the majority of financial loss. **Finding:** Fraud is migrating from rural areas to major metropolitan hubs.
